Water and Waterscapes:

Children's Right to Clean Water

The Essence of Water

Water is life. It connects us all, transcending cultural boundaries and holding spiritual significance across societies. Yet, millions of children lack access to clean water, a basic human right.

The **United Nations Convention on the Rights of the Child (UNCRC)** states that every child has the right to clean water and health (Article 24).

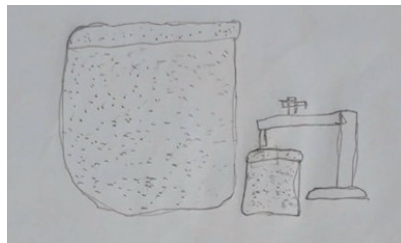

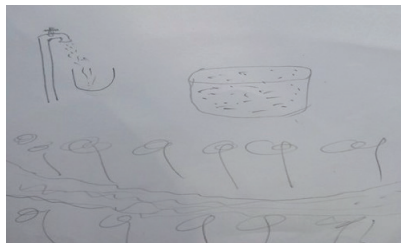

The Water and Waterscapes Project

A collaborative effort led by the KINDknow Research Center at the Western Norway University of Applied Sciences and UiT – The Arctic University of Norway, in partnership with OMEP World, OMEP New Zealand, the University of Canterbury, and Tanzania Early Childhood and Community Development (TECD).

Purpose: To raise awareness about protecting water landscapes and deepen our understanding of water as a vital resource for children globally.

Pilot: Our project has successfully completed a pilot phase in:

- **Norway**
- **New Zealand**
- **Tanzania**

Join Us: An Invitation to OMEP Members

We invite you to participate in the **Water and Waterscapes Project**!

Organize collaborative explorations with children aged 4 to 8 years to:

- Investigate local water sources for washing and drinking
- Grow their understanding of water's significance in their lives
- Foster a sense of responsibility and connection to this vital resource

Together, let's advocate for children's rights to clean water. Let's ensure no child is left behind!

Making a difference where it counts— Get involved
