# *Into the world!*

Internationalisation in bachelor's degrees

## **Work package 3**

- Increase learning outcomes for student mobility in comprehensive study programs

# Main goal: to increase learning outcomes for student mobility in comprehensive study programs

- › Three sub-goals
- › 1. Develop learning outcomes regarding student mobility in our three social education programs, that give the students an international perspective on their education and profession
- › 2. Establish educational/professional cooperation within teaching and guidance across borders
- › 3. Develop theoretical international courses for students both in and outside of Norway

# Expected results

- › With a clear understanding that our social education programs involve international perspectives and cooperations, we expect to achieve the main goal that more students want to complete studies abroad.
- › Internationalization within each study program will increase the students` ability to engage in international cooperation, critical reflection and a holistic understanding of complex work situations.

# Progress plan

- › **Current status:** mapping internationalization in the social education programs (learning outcomes), what we already have, and what can we build on.
- › Exploring possibilities 😊
- › **Timeline**
- › Implement international exchange in study programs (2022)
- › Explore the possibility for international student research groups (2022)
- › Establish educational cooperation with employees in our partner universities (2022)
- › Explore the possibility for students to write their bachelor thesis in international research groups (2023)
- › Develop theoretical international courses for students domestic and abroad (22-24)
- › Offer English speaking courses (2024)

# Tove Sandvoll Vee

- › Associate Professor
- › Employee in the social education program (learning disability nurse)
- › Nurse
